

Interview tips

Manaswini Das

Resume tips

- Review example resumes
- Know your resume inside out(include the most relevant information first)
- Choose a good template(pay attention to fonts, margin, legibility)
- Exclude unnecessary information like objective, declaration, photograph etc
- Make handles accessible(be ready to walk the interviewer through any existing code)
- Replace with words that show what you have achieved(Use active language)
- Proofread and Get feedback
- Pro tip: Use Google Docs/Overleaf and always use PDF

How to prepare for
interviews?

General interview tips

- Go through the previous experiences of interviewees for that specific position
- Expect questions from your expertise and the tech stack/projects in your resume
- Take special care of audio and video
- Take mock interviews
- Learn by explaining in case of DSA, system design questions
- Expect the what, why and hows of everything(make it a habit to deep-dive)
- Pay special attention to your cover letters/emails
- Keep a record of what you studied/interviewed and revise from time to time
- Practice, Practice, Practice

Mistakes to avoid

- Be prepared to ask them questions(Do some research about the company)
- Do not read/search during the interview
- Be ready to deep-dive
- Keep track of all interviews and your shortcomings
- Conciseness rules
- Don't belittle yourself
- Don't repeat the same mistake
- Know what you don't know(BE HONEST)
- Don't be stuck in the “preparation loop”

My experience

Any questions?

Thank you
